OUAC – Ontario Universities' Application Centre

Ontario University Research starts with **OUInfo**

Ontario Universities' Info (OUInfo) is the primary online resource for researching Ontario universities. It is a user-friendly, searchable database that provides prospective students, parents and guidance counsellors with the resources to help them make the most informed decisions about postsecondary education.

This year, OUInfo has been enhanced to include new ways for students to engage with Ontario Universities. Students can now take virtual tours, attend virtual events, view university videos and webinars, connect with university representatives and access other online resources. Students can also request information directly from Ontario universities to find out more about the ones they are interested in.

Students can also use OUInfo to find, and compare Ontario university programs and to research residences, scholarships, admission requirements and more. This resource is updated directly by the Ontario universities.
